

## *Medical Cannabis in Wisconsin?*

# Help pass the Jacki Rickert Medical Marijuana Act!

Using medical cannabis to treat debilitating illnesses remains a crime under current Wisconsin law. The Jacki Rickert Medical Marijuana Act would protect Wisconsin patients from arrest and prosecution and allow them or a designated caregiver to possess and grow a small amount of cannabis for medical use.

An updated version of the Jacki Rickert Medical Marijuana Act, sponsored by Rep. Mark Pocan (D-Madison), is awaiting introduction. Help pass this bill by contacting your Wisconsin State Senator and State Assembly Representative and request they cosponsor this legislation.
